## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Crandall (US 5940230).

Crandall teaches a wing mirror unit, in particular for a motor vehicle, comprising a base plate (20), on which by means of a pivot construction a supporting frame is provided (22), further comprising an electric actuator (30), with which the supporting frame is pivotal with respect to the base plate between a folded orientation (fig. 3), in which the supporting frame substantially abuts along the body of the motor vehicle (fig. 3), and an unfolded orientation (fig. 4), in which the supporting frame is substantially oriented transversely to the body (fig. 4), wherein, furthermore, the electric actuator is provided with an engaging part (44) coupled with the supporting frame (48), which engaging part is adjustable with respect to the base part substantially transversely to the body between a first orientation located near the base plate and a second orientation located farther outward with respect to the body (see figs. 3 and 4).

Art Unit: 2872

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Harloff (US 4969727) teaches a rear view mirror with a powered actuator.
